### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 8, line 2, replace the recited term "Claim 7" with --Claim 1--

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The Amendment filed and Terminal Disclaimer filed October 24, 2006 have overcome the rejection set forth in the Office action sent August 24, 2006.

While the cited reference of Freer (6,097,981) teaches a method with an electroencephalograph (EEG) based biofeedback system wherein a smooth, high quality computer animation is maintained while EEG responses are simultaneously being analyzed whereby the results of the analysis are then used to control the animation; and the cited reference of Gevins (5,295,491) teaches a testing method and system for testing the mental performance capability of a human subject includes a digital computer workstation which presents a test to the subject, such as visumotor memory task; Freer and/or Gevins, alone or in combination, does not anticipate or make obvious the applicant's claimed limitations of a computer-readable medium having encoded thereon a software program for testing a working memory, the

software program comprising: (a) a code segment for sequentially presenting to a subject a first plurality of images, each image positioned in a different sector of a display device, the first plurality of images totaling one fewer than a total number of sectors; (b) a code segment for simultaneously presenting to the subject a second plurality of images, one of the second plurality of images bearing an analogous relationship to the first plurality of images; (c) a code segment for prompting the subject to select an analogous image from the second plurality of images a code segment for receiving a response from the subject via an input device; and a code segment for scoring the received responses to determine a working memory and fluid reasoning indicator (as per claim 1), in combination with other presented limitations.

Claims 1, 3-6, and 8-14, therefore, are allowable.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
